PROFILE SUMMARY

Aspiring Data Scientist with knowledge in Machine Learning, Deep Learning, NLP, OpenCV, and Generative AI. Proficient in Python and experienced in building data-driven applications using NumPy, Pandas, Matplotlib, and Scikit-learn, with additional experience in full-stack development using React.js, Node.js, and Django. Familiar with REST APIs, databases, Git, and Linux environment.

EDUCATION

Coimbatore Institute of Engineering and Technology
B.Tech - Information Technology: GPA: 7.68

Coimbatore , India
2021-2025

TECHNICAL SKILLS

Languages : Python (OOP), JavaScript,

Data Science & Machine Learning: Machine Learning, Deep Learning, Natural Language Processing , OpenCV, Gen AI,

Libraries & Frameworks : NumPy, Pandas, Matplotlib, Scikit-learn, TensorFlow,OpenCV

Web Development : React.js, Node.js, Django, React Native,Next.js

Tools & Platforms : Git, GitHub,Postman, VS Code, Android Studio, Expo

Databases: MySQL, MongoDB, PostgreSQL

EXPERIENCE

Application Development Intern | XYLOINC Technology Pvt Ltd | Jan 2025 – Aug 2025

- Worked as part of the Application Development team on designing and developing software applications.
- Participated in coding, debugging, and improving applications based on project requirements.
- Collaborated with cross-functional teams to develop and deploy software solutions.
- Gained hands-on experience with modern development tools, frameworks, and backend integration.
- Involved in testing, troubleshooting, and refining applications to improve performance.
- Worked in a team environment following software development practices and methodologies.

PROJECTS

Emotion Detection using OpenCV

- Developed an emotion detection system using Python and OpenCV for facial expression recognition
- Applied image processing and Machine Learning techniques for emotion classification.
- Used NumPy and Matplotlib for data processing and visualization.
- Implemented model testing to improve prediction accuracy.

Sports Injury Prediction & Performance Analysis

- Built a Machine Learning and Deep Learning based system to predict player injury risk using historical data.
- Applied Deep Learning models to analyze player posture, movement, and performance from image data.
- Used Python, Pandas, NumPy, and Scikit-learn for preprocessing and model training.
- Generated performance insights to identify high-risk players and improve performance monitoring..

Iris Flower Classification

- Developed a Machine Learning model to classify iris flower species using the Iris dataset.
- Implemented KNN, SVM, and Decision Tree algorithms using Scikit-learn.
- I Used Pandas and NumPy for data preprocessing and Matplotlib for visualization.
- Evaluated model performance using accuracy score and comparison of algorithms.

Attendance Management System

- Developed an attendance management system to store and manage student records.
- Implemented backend logic and database integration for data storage.
- Designed simple user interface for adding, updating, and tracking attendance..
- Used python programming and database concepts for efficient data handling.

CERTIFICATES

Data Science and Generative AI Course – SLA Institute (Chennai)

April 2026

- Learned Machine Learning, Deep Learning, NLP, OpenCV, and Generative AI concepts
- Worked with Python libraries including NumPy, Pandas, Matplotlib, and Scikit-learn
- Built and evaluated Machine Learning models on real-world datasets
- Performed data preprocessing, feature engineering, and model evaluation

Python Development Certification – Udemy

- Learned core Python concepts including OOP, data structures, and functions
- Worked with file handling, exception handling, and basic scripting
- Applied Python for problem solving and basic application development
